

Addition cured vinylpolysiloxane for the reproduction of gingival masks in technical laboratory

Semi-rigid type

Usage: Indicated for implant prosthetics

- for direct method
- realization of gingival reproduction in pink vinylpolysiloxane
- easy to trim, for the determination of the shape of the cervical contours and the emergence profile in fixed or mobile prosthesis

Characteristic:

- trimming after 30 minutes from extrusion
- high index of flowability
- translucent colour which give it a natural appearance like real gingiva
- elasticity comparable to natural tissue
- balanced tear strenght
- hardness 70 Sh. A after 30 minutes
- high dimensional stability
- no greasy surface

Packaging: cartridge 50 ml.

Extrusion with appropriate dispenser
